Authorization for this examiner's amendment was given in a telephone interview with Adam Keser on Nov. 10, 2005.

independent claims include an information detecting portion provided in a conveying passage for detecting information pertaining to the length in the taking-in direction of the sheets; a sheet accumulating portion with an accumulating stack and an accumulating stacker drive portion to lower said stacker; tip end and rear end regulating walls; at least one stopper which can move between an advancement position and a retreating position and wherein the stopper is on either the sheets or the stacker; a stopper support for moving the stopper in the vertical direction; a stopper driving portion for changing the stopper between an advanced position and the retreat position; a controller for controlling a stopper driving portion on the basis of the length of the sheets in response to the length of the sheets. These features in combination with the other limitation of the independent claims define over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
